

[1] QID: 7

Question : The program calculates the sum of array elements, but it produces an incorrect result. Identify the problem and fix it.

```
public class Q6_ArraySum {  
    public static void main(String[] args) {  
        int arr[] = {1,2,3,4};  
        int sum = 0;  
        for(int i=0;i
```

Program : import java.util.*;

class element

```
{  
    public static void main(String args[])  
    {
```

```
        int arr[]={1,2,3,4};
```

```
        int sum=0;
```

```
        for(int i=0;i
```

Input : (no input)

Output : Error: Failed to execute program. Please check console.

[2] QID: 20

Question : A loop condition prevents execution of the loop body. Identify and correct the condition.

```
public class Q20_LoopCondition {  
    public static void main(String[] args) {  
        int arr[] = {1,2,3,4};  
        for(int i=0; i
```

Program : import java.util.Scanner;

class loop

```
{  
    public static void main(String args[])  
    {
```

```
        int arr[]={1,2,3,4};
```

```
        for(int i=0;i
```

Input : (no input)

[3] QID: 2

Question : The following Java program is intended to print all elements of an array. However , it throws an error during execution. Identify and correct the mistake in the loop condition.

```
public class Q1_ArrayIndex {
    public static void main(String[] args) {
        int arr[] = {10, 20, 30};
        for(int i = 0; i < arr.length; i++){
            System.out.println(arr[i]);
        }
    }
}
```

Program : import java.util.Scanner;
public class element
{
 public static void main(String args[])
{
 int arr[]={10,20,30};
 for(int i=0;i
Input : (no input)
Output : 10
20
30

[4] QID: 12

Question : A loop skips the first element of an array while printing values. Identify the error in the loop and correct it.

```
public class Q12_LoopFix {
    public static void main(String[] args) {
        int arr[] = {1,2,3};
        for(int i=0; i
```

Program : import java.util.Scanner;
public class element
{
 public static void main(String[]args)
{
 int arr[]={1,2,3};
 for(int i=0;i

Input : (no input)
